Plant and Soil

International Journal on Plant – Soil Relationships

Issued under the auspices of the Royal Netherlands Society of Agricultural Science

Editorial Board: M. Adams, *Melbourne, Australia*; C. Atkins, *Perth, Australia*; A.J.M. Baker, *Melbourne, Australia*; P. Bakker, *Utrecht, The Netherlands*; R.W. Bell, *Murdoch, Australia*; R.M. Boddey, *Rio de Janeiro, Brazil*; A.C. Borstlap, *Utrecht, The Netherlands*; J.W.G. Cairney, *Sydney, Australia*; I. Cakmak, *Istanbul, Turkey*; J.M. Cheeseman, *Urbana, IL, USA*; D.E. Crowley, *Riverside, CA, USA*; D. Douds, *Wyndmoor, PA, USA*; P.J. Gregory, *Reading, UK*; A. Hodge, *York, UK*; T. Kalapos, *Budapest, Hungary*; T.B. Kinraide, *Beaver, WV, USA*; H.J. Kronzucker, *Toronto, Canada*; J. Lynch, *University Park, PA, USA*; P. Marschner, *Adelaide, Australia*; F.R. Minchin, *Aberystwyth, UK*; C. Neill, *Woods Hole, MA, USA*; P. Randall, *Canberra, Australia*; S. Recous, *Laon, France*; H. Schat, *Amsterdam, The Netherlands*; L. Stoumann Jensen, *Fredriksberg, Denmark*; G.J. Taylor, *Edmonton, Canada*; C. Vance, *St. Paul, MN, USA*; J.K. Vessey, *Winnipeg, Canada*; L. Wade, *Crawley, Australia*; F.J. Zhao, *Hertfordshire, UK* and Y.-G. Zhu, *Beijing, China*

Editor-in-Chief: H. Lambers, *Perth, Australia*

Managing Editors: P. Poot and L. Bultynck, *Perth, Australia*

Consulting Editors:

P. Ambus, *Roskilde, Denmark*
J. Barcelo, *Hertfordshire, UK*
T.J. Bouma, *Yerseke, The Netherlands*
M. Brundrett, *Crawley, Australia*
B. Chen, *Beijing, China*
T.D. Colmer, *Perth, Australia*
M. Corbeels, *Planaltina, Brasil*
M.F. Cotrufo, *Caserta, Italy*
M. Cramer, *Rondebosch, South Africa*
R.A. Dahlgren, *Davis, USA*
S.O. Duke, *University, USA*
D.J. Eldridge, *Sydney, Australia*
A. Escudero, *Salamanca, Spain*
J.E. Fernandez, *Sevilla, Spain*
J. Flexas, *Palma de Mallorca, Spain*
T.S. Gahoonia, *Copenhagen, Denmark*
T. George, *Canberra, Australia*
M. Geypens, *Leuven, Belgium*
X. Han, *Beijing, China*
P. Hinsinger, *Montpellier, France*
E. Hofland, *Wageningen, The Netherlands*
J.W. Hofmans, *Davis, USA*
Dr. Inderjit, *Delhi, India*
E.J. Joner, *Aas, Norway*
T. Kaspar, *Ames, IA, USA*
P.K. Khanna, *Goettingen, Germany*
Y. Kuzyakov, *Stuttgart, Germany*
R. Larkin, *Orono, ME, USA*
J. Lehmann, *Ithaca, NY, USA*
E. Lombi, *Glen Osmond, Australia*
J.F. Ma, *Kagawa, Japan*
H. Majdi, *Uppsala, Sweden*
R. Merckx, *Leuven, Belgium*
R.E. Munns, *Canberra, Australia*
R.J.K. Myers, *Andhra Pradesh, India*
B. Nicolardot, *Reims, France*
C. Ong, *Nairobi, Kenya*
D.R. Parker, *Riverside, CA, USA*
M. Peoples, *Canberra, Australia*
R.J. Reid, *Adelaide, Australia*
H. Rennenberg, *Freiburg, Germany*
I.T. Riley, *Glen Osmond, Australia*
A.M. Rychter, *Warsaw, Poland*
P.T. Rygiewicz, *Corvallis, OR, USA*
W. Schmidt, *Udine, Italy*

PLANT AND SOIL

Contents Volume 272 Nos. 1–2 May 2005

Fine root production and litter input: Its effects on soil carbon
L.B. Guo, M.J. Halliday, S.J.M. Siakimotu and R.M. Gifford **1–10**

Variation in relative growth rate of 20 *Aegilops* species (Poaceae) in the field: The importance of net assimilation rate or specific leaf area depends on the time scale
R. Villar, T. Marañón, J.L. Quero, P. Panadero, F. Arenas and H. Lambers **11–27**

Arbuscular mycorrhiza decreases cadmium phytoextraction by transgenic tobacco with inserted metallothionein
M. Janoušková, D. Pavlíková, T. Macek and M. Vosátka **29–40**

Divergent effects of elevated CO_2, N fertilization, and plant diversity on soil C and N dynamics in a grassland field experiment
F.A. Dijkstra, S.E. Hobbie, P.B. Reich and J.M.H. Knops **41–52**

Effect of Si on the distribution of Cd in rice seedlings
X. Shi, C. Zhang, H. Wang and F. Zhang **53–60**

Fractal geometry and root system structures of heterogeneous plant communities
M. Dannowski and A. Block **61–76**

Selenium – an antioxidative protectant in soybean during senescence
M. Djanaguiraman, D. Durga Devi, A.K. Shanker, J.A. Sheeba and U. Bangarusamy **77–86**

Longer coleoptiles improve emergence through crop residues to increase seedling number and biomass in wheat (*Triticum aestivum* L.)
G.J. Rebetzke, S.E. Bruce and J.A. Kirkegaard **87–100**

Kernel set in maize genotypes differing in nitrogen use efficiency in response to resource availability around flowering
I.A. Paponov, P. Sambo, G. Schulte auf'm Erley, T. Presterl, H.H. Geiger and C. Engels **101–110**

Grain yield and kernel weight of two maize genotypes differing in nitrogen use efficiency at various levels of nitrogen and carbohydrate availability during flowering and grain filling
I.A. Paponov, P. Sambo, G. Schulte auf'm Erley, T. Presterl, H.H. Geiger and C. Engels **111–123**

An *in situ* approach for measuring root-associated respiration and nitrate uptake of forest trees
T.J. Fahey and J.B. Yavitt **125–131**

A study of the activity and ecological significance of carbonic anhydrase from soil and its microbes from different karst ecosystems of southwest China
W. Li, L.-j. Yu, D.-x. Yuan, Y. Wu and X.-d. Zeng **133–141**

Mixed culture of wheat (*Triticum aestivum* L.) with white lupin (*Lupinus albus* L.) improves the growth and phosphorus nutrition of the wheat
S.T.T. Cu, J. Hutson and K.A. Schuller **143–151**

Root traits, nutrients uptake, multi-location grain yield and benefit–cost ratio of two lentil (*Lens culinaris,* Medikus.) varieties
T.S. Gahoonia, O. Ali, A. Sarker, M.M. Rahman and W. Erskine **153–161**

Endophytic fungi (*Neotyphodium coenophialum*) affect the growth and mineral uptake, transport and efficiency ratios in tall fescue (*Festuca arundinacea*)
M.H. Rahman and S. Saiga **163–171**

Effect of silicate on the growth and arsenate uptake by rice (*Oryza sativa* L.) seedlings in solution culture
W. Guo, Y.-L. Hou, S.-G. Wang and Y.-G. Zhu **173–181**

Dry season groundnut stover management practices determine nitrogen cycling efficiency and subsequent maize yields
S.P.N. Sakonnakhon, B. Toomsan, G. Cadisch, E.M. Baggs, P. Vityakon, V. Limpinuntana, S. Jogloy and A. Patanothai **183–199**

Ability of bacterium *Bacillus subtilis* to produce cytokinins and to influence the growth and endogenous hormone content of lettuce plants
T.N. Arkhipova, S.U. Veselov, A.I. Melentiev, E.V. Martynenko and G.R. Kudoyarova **201–209**

Spatial root distribution of apricot trees in different soil tillage practices
M.C. Ruiz-Sánchez, V. Plana, M.F. Ortuño, L.M. Tapia and J.M. Abrisqueta **211–221**

Antimicrobial proteins from cowpea root exudates: inhibitory activity against *Fusarium oxysporum* and purification of a chitinase-like protein
F.M. Nóbrega, I.S. Santos, M. Da Cunha, A.O. Carvalho and V.M. Gomes **223–232**

Genotypic differences in manganese efficiency: field experiments with winter barley (*Hordeum vulgare* L.)
C.A. Hebbern, P. Pedas, J.K. Schjoerring, L. Knudsen and S. Husted **233–244**

The use of microbial siderophores for foliar iron application studies
V. Fernández, G. Ebert and G. Winkelmann **245–252**

Temporal variation in nutrient uptake capacity by intact roots of mature loblolly pine
M.S. Lucash, J.D. Joslin and R. Yanai **253–262**

Soil aggregate sequestration of cover crop root and shoot-derived nitrogen
Y. Kavdır and A.J.M. Smucker **263–276**

Phytoremediation of heavy metal and PAH-contaminated brownfield sites
S. Roy, S. Labelle, P. Mehta, A. Mihoc, N. Fortin, C. Masson, R. Leblanc, G. Châteauneuf, C. Sura, C. Gallipeau, C. Olsen, S. Delisle, M. Labrecque and C.W. Greer **277–290**

Adsorption of allelopathic compounds by wood-derived charcoal: the role of wood porosity
O. Keech, C. Carcaillet and M.-C. Nilsson **291–300**

Effect of aluminium and pH on the mobility of phosphate through a soil-root interface model
C.E. Gessa, T. Mimmo, S. Deiana and C. Marzadori **301–311**

Comparison of N losses (NO_3^-, N_2O, NO) from surface applied, injected or amended (DCD) pig slurry of an irrigated soil in a Mediterranean climate
A. Vallejo, L. García-Torres, J.A. Díez, A. Arce and S. López-Fernández **313–325**

Ability of seedling roots of *Lolium perenne* L. to penetrate soil from artificial biopores is modified by soil bulk density, biopore angle and biopore relief
J.R. Hirth, B.M. McKenzie and J.M. Tisdall **327–336**

Arsenic accumulation of common plants from contaminated soils
P.A. Gulz, S.-K. Gupta and R. Schulin **337–347**

DenNit – Experimental analysis and modelling of soil N_2O efflux in response on changes of soil water content, soil temperature, soil pH, nutrient availability and the time after rain event
S. Reth, K. Hentschel, M. Drösler and E. Falge **349–363**

Root characteristics of selected field crops: Data from the Wageningen Rhizolab (1990–2002)
A.L. Smit and J. Groenwold **365–384**

Instructions for authors **385–388**
